SUMMARY

I am a full stack web developer, eager to solve puzzles through logic and code. My desire for knowledge makes me an independent problem solver. Using clear code, I forge and enhance efficient web apps to complement user's lives.

PROJECTS

Roommate Site: Made dank shit.

Built PC: Taught myself to build and troubleshoot computer systems.

EXPERIENCE

General Assembly, Seattle — *Web Developer*

January 2017 - Present

Took part of an 80+hour/week boot-camp-style course. I created projects such as games, full stack apps and bots with CRUD functionality to solidify my skills as a web developer. Using Git to manage my projects, I learned to implement DRY code in an agile environment.

Buffalo Wild Wings, Marysville — *Bartender*

April 2015 - January 2017

Starting as a captain who would roam and promote the company, I quickly was promoted to host, server and most recently bartender. I provide wonderful service and make sure the guests are satisfied.

FedEx Office, Everett — *Consultant*

March 2013 - September 2014

Attended to customer's particular needs creating custom projects such as advertising material production.
